

Intent Map Template

Author: Lakshmi Sagar SP

Data Safety Disclaimer

This framework is **fully abstracted**.

- No real customer data
- No identifiers
- No internal thresholds
- No proprietary systems

It is intended to demonstrate **methodology and thinking**, not expose sensitive information.

Case Metadata (Abstracted)

- **Case Type / Context:**
 - **Review Trigger:**
 - **Analysis Period:**
 - **Overall Risk Assessment:** Low / Medium / High
-

Behavioural Flags Used

List only the **most relevant behavioural flags** observed in this case.

- Flag 1:
- Flag 2:
- Flag 3:
- Flag 4 (if applicable):

Guidelines

- Keep to **2–5 flags**

- Prefer strong behavioural indicators over weak anomalies
- Avoid introducing flags that do not influence intent

Intent Map (Phase-wise):

Phase	Time Window	Dominant Behavioural Flags	Behaviour Summary	Inferred Intent	Risk Assessment	Likely Next Action
Phase 1						
Phase 2						
Phase 3						
Phase 4 (if needed)						
Phase 5 (if needed)						

Phase Design Rules

- Aim for **3–6 phases**
- Merge short or noisy activity into the nearest stable phase
- Split phases only when behaviour **meaningfully changes**
- Each phase should represent a **clear behavioural state**

Narrative Summary

Summarise the account behaviour in **plain language**:

- What changed from normal to suspicious?
- Was the behaviour **structured or random**?
- Did the activity show **testing** → **execution** → **evasion** patterns?
- Does it align with known fraud or misuse typologies?

(Keep this concise: ~5–7 lines)

Detection Opportunity

Answer the following questions:

- Which **combination of behavioural flags** could have detected this earlier?
 - Was the risk visible **before execution**, or only after?
 - Did existing rules fail due to:
 - Missing sequencing?
 - Rigid thresholds?
 - Lack of intent awareness?
-

Rule / Hypothesis Output

Detection Hypothesis: If an account shows [**Behaviour A**] followed by [**Behaviour B**] within a relative time window, it may indicate [**inferred intent**].

Rule Definition (Abstracted)

- **Objective:**
 - **Applicable Behaviour / Persona:**
 - **Core Logic (flag combinations):**
 - **Expected Detection Behaviour:**
 - **False Positive Risk:** Low / Medium / High
-
